

# Benefits

## A New *Expertise*

### Improve Patient Care & Reduce Medical Errors

- In real time, integrate bedside vital signs and IV medication with the greater information flow
- Send alarm notifications to any location
- Automate data transcription/charting
- Link directly from the infusion pump to pharmacy system & MAR
- Have visibility across all patients at your fingertips

### Optimize Workflow

- Reduce charting time and "run around" time looking for information
- Document device data automatically
- Send IV bag status directly to pharmacy prep area enabling prioritization of work orders
- Connect directly to the supply chain system

### Transform Device Resource Management

- Enable a bi-directional link between the device and device resource management applications

Hospitals are demanding a closed information loop between the medical device and hospital information systems.

Sensitron's unique combination of expertise in hardware, embedded software, wireless communications, network configuration and application software readily complements and links the medical device and HCIT company offerings.
